

## **CUTTING EDGE EXPLORATIONS**

**"Lecture/Trunk Show" Valerie S. Goodwin R.A. – Fiber Artist**

Length can be tailored to suit your group's requirements

Technology's increasing influence on the world of art is a widespread. It is changing how art is made and technology has been providing artists with new ways to express themselves for a very long time. My current work as a quilt artist has been affected by technology, specifically through the use of laser cutting technology. I plan to elaborate on how I use it in my fiber art maps and in my work as an architectural educator.

This talk will focus on these questions:

- How does technology push art?
- How can it push work of artists who work in textiles arts?
- How has laser cutter technology influenced my work as a fiber artist?
